Moat: India's first conditional UPI autopay system

What we're building:

- A security layer to our trial-first model using Conditional UPI Autopay Mandates

How it works:

- Customer enters UPI ID or phone number once
- A conditional mandate is set (valid up to ₹5,000)
- No charge is made during the trial
- Mandate is triggered only if:
 - a. Products are not returned
 - b. Items are returned damaged

Why it's a Moat:

- Solves fraud, scam & loss risks without needing upfront payments
- First time in India, UPI mandates used beyond subscriptions
